

Geogebra installation problem

In windows 10, I uninstalled Geogebra and then I tried to reinstall it, but it cannot be installed correctly.

I explain the problem:

I uninstall geogebra firstly from the control panel.

Then, I follow the instructions from the official webpage “[Reference:GeoGebra Installation FAQ](https://wiki.geogebra.org/en/Reference:GeoGebra%20Installation%20FAQ)”

([https://wiki.geogebra.org/en/Reference:GeoGebra Installation FAQ](https://wiki.geogebra.org/en/Reference:GeoGebra%20Installation%20FAQ)) :

6. GeoGebra Classic 6 Won't Start (or opens off-screen)

“ Delete this folder `C:\Users\<username>\AppData\Roaming\GeoGebra`

This is a hidden folder, so can be hard to find. One way is to press <Windows>R and then copy and paste this (changing <username> to your Windows username)

`explorer /n, /e, /select, C:\Users\<username>\AppData\Roaming\GeoGebra`

then right-click -> Delete “.

Then, I download the file from the official web site

“ GeoGebra-Windows-Installer-6-0-414-0.exe “ and I try to run the file and to install the geogebra software.

But the installation is not performed correctly (I think so...) and it opens the same window exactly with the window which can be opened with a browser for the web page “<https://www.geogebra.org/classic>”.

Also, in the start menu the program does not appear as follows from the next snapshot:

...but in control panel appears as have been installed, as follows from the next snapshot:
