

This is the way the template applet opens since 24-1-2018. Resolution indicator shows questionmarks. Should not be the case. Apart from that, the size of the template applet is wrong. It was made to open at a certain specified dimensions.

This is the way it did look after opening for more than two years.

It looks to me as if there is something wrong with the cornerpoints in geogebra classic 5 that regulate the size of the applet
